

# Pd(0)-catalyzed amination in the synthesis of bicyclic compounds comprising triazacycloalkane and fluorophore moieties

Alexei D. Averin, Nataliya M. Chernichenko, Vadim N. Shevchuk, Olga A. Maloshitskaya, Franck Denat and Irina P. Beletskaya

## Supporting Information

**Figure S1.** Fluorescence spectra of compound **11** in the presence of 20 various metal salts (5equiv.).

Figure S2. UV-vis spectra of the ligand 11 in the presence of different metals (5 equiv.).

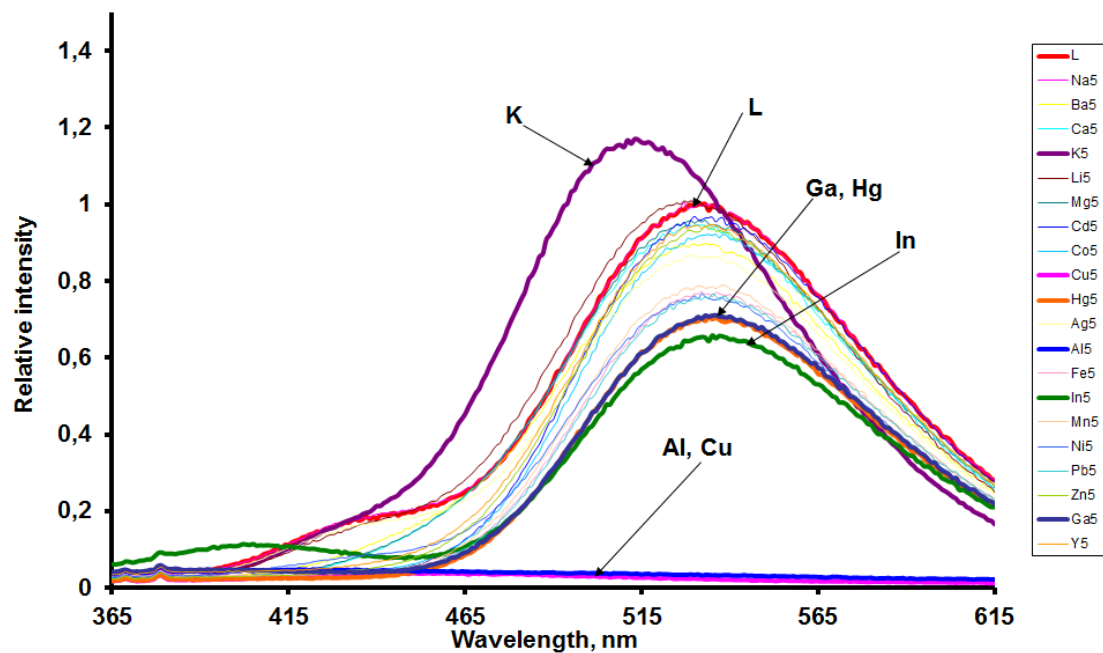

Figure S3. Fluorescence spectra of the ligand 12 in the presence of different metals (5 equiv.).

**Figure S4.** Fluorescence spectra of the ligand **13** in the presence of different metals (5 equiv.).
